Sentronic^D | 608 Series and 609 Series
Proportional Technology
Sentronic™

Sentronic™ is a digitally operated pressure regulator valve.

Sentronic™ stands for:
- Digital control
- Display (integrated)
- Direct operated valve

With the Data Acquisition Software (DaS) and the RS232 interface, it’s now possible to optimally adjust the valve’s control parameters to a specific application. The scope function allows you to log and read the system’s response in real time.

The DaS capabilities streamline the development process and identify application-specific problems at an early stage. Saved parameters can also be used for future production so that valves are factory-set to a specific application.
### How to Order

**Nominal Diameter**
- 608 = DN 4mm
- 609 = DN 8mm

**Version (ports, Body)**
- 0 = G 1/8 (DN4), G 1/4 (DN 8)
- 1 = G 1/4 (DN 4), G 3/8 (DN 8)
- 2 = Manifold version¹, G 1/4 (DN 4), G 3/8 (DN 8)
- 6 = NPT 1/4 (DN 4), NPT 3/8 (DN 8)

By connecting the Sentronic™ to a PC with an RS232 interface, the Data Acquisition Software (DaS) can be used to optimally adjust the valve’s control parameters to a specific application. DaS has an oscilloscope function that allows the user to select and visually see various response characteristics as the valve operates in an application. Control loop parameters can be adjusted using the software without removing the valve from service. This functionality streamlines the application development process. Control parameters can be saved and reloaded at any time.

The DaS software offers the following features:
- **Real time display of:** command signal, outlet pressure, internal control parameters (e.g. P, I or D), pressure switch signal, etc.
- **Parameter setting:** command signal, zero offset, span, limitation of output current, ramp function, etc.
- **Diagnostics menu for error detection and testing**
- **Custom adjustment to an application**
- **Control of Sentronic™**

[Advantages]
- Minimum hysteresis
- Quick response times
- Very high sensitivity
- Standard 50 µm filtration
- No constant air consumption
- Analog feedback output
- Easy change of control parameters
- Digital control
- Integrated display (optionally without)
- PC communication

Sentronic®
1/8 to 3/8 tapped body or 1/8 - 1/4 subbase mounted body (NPT or GTap)

- Sentronic® is a highly dynamic 3-way proportional valve with digital control
- Sentronic® stands for:
  - Digital communication and control
  - Display (integrated)
  - Direct operated valve
- A special feature of the Sentronic® is its DaS software supplied for optimum adjustment via PC and viewing of command and feedback signals
- Other functions are valve diagnostics, parameter setting and maintenance
- Sentronic® can be configured for dual loop control of process variables such as flow, force, speed, RPM and temperature
